

Climate –Warming Practices Did you know?

Canada still produces 87% of its energy from oil, natural gas and coal, which is mostly sold to the United States

10% of the world's population accounts for 80% of motorized passenger kilometres

Bottled water takes 2,040 times more energy to produce than tap water

We often use disposable items without thinking of the climate impact of their production, transportation and disposal.

Canadians produce more garbage per capita than any other nation

Those who do the **least** to cause climate change suffer the **most**.

Let's Create a Climate of Change!

Our planet earth is a gift from God

It is urgent that we act

It is time to guide our planet in its development and in its peace

We can change our lifestyle – reduce our carbon footprint – take public transportation ... buy locally

We can change our community – support local green initiatives in our school, parish and municipality

We can change our country – call on government to abandon harmful fossil fuels and transition to renewable energies

Together we can make a difference!

When you came in you were given a card to sign.

SHOW CARD

There are pens in the pews.

READ CARD

**Please take a minute to check off
a commitment to reduce your carbon footprint**

TURN CARD OVER

READ CARD

and on the reverse

**sign the card to be sent to the Prime Minister
now before he leaves**

**for the United Nations Climate Change Conference
held in Paris from November 30 to December 11, 2015**

**We ask that you leave the cards in the pews so we can count
them**

We will collect them later and mail them

**Thank You for participating in
Development & Peace Fall Campaign 2015!**
